

THESIS STATEMENT

1. I agree that people who suffer from diseases due to smoking should not benefit from the health care system as it is not fair to spend the money of non-smokers on smokers, and these people take health risks deliberately so they should be responsible for the consequences, not the public.

✓ (Paraphrased, elaborate and includes the main points - **OK**)

2. I agree that smokers should not benefit from the health care system for several reasons.
(Too simple and repetitive of the prompt – **NOT GOOD**)

3. Although the health care system is for all people in that country, **I believe that** the government should ensure that the treatment for diseases caused by smoking is the smokers' responsibility.

(More level appropriate and elaborate BUT the summary of main points is missing - **INCOMPLETE**)

1. I definitely disagree with the idea that the health care system should leave the smokers out because the government should not discriminate between different groups in the society, and smokers also contribute to the system as much as non-smokers.

✓ (Paraphrased, elaborate and includes the main points - **OK**)

2. I disagree with the idea that smokers should not benefit from the health care system.
(Again, simple and repetitive – **NOT GOOD**)

3. The concerns regarding the treatment of diseases associated with smoking are reasonable, but all the same, **I think that** the health care system should serve for the benefit of all people in a society including the smokers.

(More level appropriate and elaborate BUT the summary of main points is missing - **INCOMPLETE**)
