

PEER FEEDBACK

“Poor soul. Beaten down by peer reviews.”

Peer Feedback Assignment

Peer feedback is the process of providing constructive comments on a classmate’s work. In this activity, you will review your partner’s essay on **Alternative Forms of Medicine** and provide both formative and summative feedback.

Step 1: Exchange Essays

Exchange your essay with a partner assigned in Canvas. Read your partner’s essay carefully from beginning to end.

Step 2: Review the Criteria

Look at the feedback criteria below before you begin. Pay attention to content, organization, language use, grammar, vocabulary, and overall clarity.

Step 3: Give Formative Feedback

Write specific comments about your partner’s strengths and areas for improvement. Explain what works well and what can be improved. Give clear suggestions that can help your partner revise the essay.

Step 4: Give Summative Feedback

Use the rubric uploaded in this assignment in Canvas **to evaluate your partner’s essay. Assign scores based on the assessment criteria.**

Step 5: Discuss the Feedback

Share your comments with your partner respectfully. Ask questions if something is unclear, and listen carefully to the feedback you receive. Each one of you will share their feedback in a zoom meeting. You will receive a schedule with the timing.

Step 6: Revise Your Essay

Use your partner’s feedback to improve your own essay before submitting the next draft. The final draft will be graded by the instructor and discussed during tutorials.

Be respectful, specific, and constructive. Your goal is to help your partner improve their writing and to use feedback to strengthen your own work.

ORGANIZATION	☐ Does the introduction start with a hook and successfully narrow down to the thesis statement? ☐ Is the thesis statement placed correctly?
